DETAILED ACTION

Applicant's arguments, see paper, filed 10/30/07, with respect to the rejection(s) of claim(s) 1-12 under 35 USC 112, 1st and 2nd paragraphs have been fully considered and are persuasive. Therefore, the rejection has been withdrawn. However, upon further consideration, a new ground(s) of rejection is made below.

Claim Rejections - 35 USC § 112

The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

Claims 1-12 are no longer rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the written description requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventor(s), at the time the application was filed, had possession of the claimed invention. There is no written description of "in sufficient quantity" in the specification. In addition, claim 9 recites "fresh material". There is no description of "fresh material" in the specification.

Response to Applicants' argument

The claims have been amended to replace "in sufficient quantity" by "an effective amount". This amendment overcomes the rejection above.

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claim 1-12 are no longer rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claims 1-12 recite the limitation "the ensilaged material" in claim 1 lines 5-6. There is insufficient antecedent basis for this limitation in the claim.

Claims 1-6 recite the limitation "the material" in claim 1 line 2. There is insufficient antecedent basis for this limitation in the claim.

Claim 3 recites the limitation "the crop material" in line 2. There is insufficient antecedent basis for this limitation in the claim.

Response to Applicants' argument

Claims have been amended to correct antecedent basis problems. For this reason the 112, 2nd paragraph rejections above have been withdrawn.

Claim 3 is also unclear since it recites that "compound is applied to per gram fresh weight". The claim does not include the object to which the compound is being applied to. It appears that the compound is being applied to "forage".

Response to Applicants' argument

Claim 3 has been amended to set forth that the compound is applied to "the crop material to be ensilaged". For this reason the rejection is withdrawn.

New Rejection

Claim Rejections - 35 USC § 112

The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the

art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

Claim 9 is rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the written description requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventor(s), at the time the application was filed, had possession of the claimed invention. In claim 9 last line the phrase "fresh weight" is recited. This phrase appears to be new matter.

Election Status / Allowable Subject Matter

The Election Requirement is withdrawn. Claims 1-8,10-12 are allowable. The prior art does not teach or suggest the contacting of crop material to be ensilaged with an o-diphenol compound and polyphenol oxidase at the time of ensilaging.

Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of

the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
